Details

Special powdered mix to make leavened products, as well as croissants and other puff pastry recipes. Highly freeze-resistant and perfect to combine with all our best creamy spreads, making your products a true stand out from the competition. Also available in a version enriched with grains.

Description

cake mix for the production of croissants, croissant brioches, brioches, bread plaits, 'veneziane', 'colombine', doughnuts, cream puffs with fast method (direct).

Denomination

semifinished product for baked pastries.

Directions for use

CROISSANT

PANDORA DOLCE_____ 1000g

yeast_____ 50g

water at 20°C_____ 400-420g

margarine platte crois.____ 300g

KNEADING: knead the PANDORA DOLCE, yeast and water until a smooth, velvety consistency is obtained, leave to rest at room temperature for 10 minutes.

METHOD: roll out the dough, place the margarine in the center and fold the dough over on itself so that the margarine is completely enveloped. Roll out again and fold it into three layers. Repeat the rolling out and folding procedure.

Leave to rest for 10 minutes, then roll out to a thickness of about 4 millimetres and cut into triangles of the desired weight. Roll up the triangles tightly and place them on baking sheets, curling the ends to give them the traditional croissant shape.

LEAVENING: leave in a rising room at 28-30°C with relative humidity of about 80% for 60-80 minutes. It is advisable to move on to the baking stage before the leavening has reached its maximum.

BAKING: at 200°C for about 20 minutes, after having glazed them with beaten egg.
