INFO

Description

red coloured jelly ready for use, particularly suitable for glazing pastry products. It keeps its extremely shining aspect also at -20°C. Ideal for products with a serving temperature of +5°C and -18/-20°C.

Denomination

semi-finished pastry product for decoration.

Directions for use

irca
GROUP

Extraordinary
made simple.

Take the necessary quantity of glaze from the bucket and mix with a hand blender until smooth and fluid, without englobing air. Take the sweet from the freezer (18/20°C), eliminate any surface frost, and place it on a proper grate. Cover with glaze using a spatula if necessary and remove the excess icing with a light vibration of the grate. Store in the refrigerator or in the freezer, as needed.

If a blender is not available, mix gently with a spatula, still avoiding air incorporation.

For better fluidity, you can heat the icing in the microwave up to 33/35°C or add water to the icing up to a maximum of 5%.
