FIORDIMADRE

yeast

PREPARATION

10.000g Knead all the ingredients for about 10 minutes (spiral kneading machine), 7.600g until the dough is smooth and well-combined.

200g Anyway, keep on kneading until the dough is well elastic.

300g Make sure that the temperature of the dough at the end of the kneading is $26-27^{\circ}$ C.

Let the dough rest for 30 minutes at 22-24°C.

Divide the dough into 150g portions and roll them up into a ring shape. Move onto well floured boards and let rise in the proofer room at 22-24°C,

with relative humidity of the 70-80%, for about 50-60 minutes.

Final composition

Before baking, turn the ring-shaped loaves upside down and make two parallel cuts onto the floured surface. Bake at 220-230°C for about 20-25 minutes.

It is advisable to open the valve towards the end of the baking so as to allow bread to dry out well.
