## FIRST DOUGH

### DOLCE FORNO MAESTRO

yeast  
water  
caster sugar  
egg yolk  
unsalted butter 82% fat

6500g  
30g  
2500g  
500g  
1500g  
1750g

Knead DOLCE FORNO MAESTRO, yeast and all the dose of water indicated in the recipe.

When the dough begins to take shape pour the sugar and then the yolks gradually in more than once and keep on kneading until the dough is well-combined and smooth.

At the end, add softened butter in 3-4 times.

Make sure that the temperature of the dough is 26-28°C.

Let rise for 12-14 hours at 20-22°C with the 60-70% of relative humidity. If the proofer room is devoid of humidifier, cover the dough with a plastic cloth.

The dough shall quadruple its initial volume.

ADVICE:

- We suggest to cut out a 250g piece of dough and to put it into a 1L jug to check the pace of the leavening and verify the quadruplication of the volume.

- We suggest to begin to knead at second speed and then, when at  $\frac{3}{4}$  of the kneading time, change to first speed and bring the kneading to end.

- If the temperature of the first dough is above 28°C, it will be necessary to decrease the leavening time.

IMPORTANT:

- If you are using a planetary mixer with a "dough hook" attachment or a spiral mixer you will have to reduce the amount of water specified in the first dough (we suggest you to use 2500/2200 gr)

## SECOND DOUGH

### DOLCE FORNO MAESTRO

water	4000g
caster sugar	750g
salt	750g
egg yolk	100g
unsalted butter 82% fat	1700g
honey	2000g
raspberries	150g
MINUETTO FONDENTE ECUADOR 70%	3500g
java pepper	2000g
	30g

The next morning, the dough shall be quadrupled and slightly curved.

Add DOLCE FORNO MAESTRO and water to the first dough and knead for 5-10 minutes.

When well-combined, add sugar, honey, salt, pepper and one part of egg yolk. Then add the remaining egg yolk in few times.

Once the mixture is ready, add softened butter in 3-4 times.

Lastly add semi-candied raspberries and than chocolate.

Be sure that the temperature of the dough is 26-28°C.

Let the dough rest in the proofer room at 28-30°C for about 90 minutes.

Divide the dough into portions of the required size and roll each portion up into a ball shape.

Move onto boards or trays and leave to rest at 28-30°C for another 20 minutes.

Roll them up tight again and transfer into the specific paper molds.

Put in the proofer room at 28-30°C with relative humidity of about 60-70% until the top of the dough will be up to 1cm from the edge of the mold; if the proofer room is devoid of humidifier, cover the dough with plastic sheets.

## AFTER COOKING GLAZE

### COVERDECOR DARK CHOCOLATE

qb Melt COVER DECOR at 50°C.

## FINAL COMPOSITION

-At the end of the rising, leave the veneziana exposed to the air for 20 minutes until a light film forms over the surface.

-Cut the four flaps under the skin and place a small piece of cold butter in the center of the veneziana.

-Bake at 160-170°C, time depending on the weight (consider about 50-55 minutes for 1000g veneziana), until the temperature of the center reaches 93-95°C.

-As soon as they are removed from the oven, the veneziana should be placed onto the specific toothed racks and left to cool upside down for 8-10 hours.

-Cover the veneziana's surface with COVER DECOR DARK CHOCOLATE and decorate with DOBLA CURLS PINK.

-Wrap it in Moplefan bags.
