

PANETTORE WITH CEREALS AND SEEDS

Basic level

LARGE LEAVENED PRODUCT

FIRST DOUGH

INGREDIENTS

DOLCE FORNO DECORGRAIN

water - (28-30°C) unsalted butter 82% fat - (morbido) fresh yeast

PREPARATION

6.500g Knead DOLCE FORNO, DECORGRAIN, yeast and 2/3 of the dose of water 1.000g indicated in the recipe.

3.300g When the dough begins to take shape, pour the remaining water gradually 1.100g in more than once and keep on kneading until the dough is well-combined and smooth.

At the end, add softened butter in 3-4 times.

Keep on kneading until the dough looks smooth and dry (the kneading time shall be about 30-35 minutes).

Make sure that the temperature of the dough is 26-28°C.

Let rise for 12-14 hours at 22-24°C with the 70-80% of relative humidity. If the proofer room is devoid of humidifier, cover the dough with a plastic cloth. The dough shall quadruple its initial volume.

ADVICE:

- We suggest to cut out a 250g piece of dough and to put it into a 1L jug to check the pace of the leavening and verify the quadruplication of the volume.
- We suggest to begin to knead at second speed and then, when at $\frac{3}{4}$ of the kneading time, change to first speed and bring the kneading to end.

SECOND DOUGH

INGREDIENTS

DOLCE FORNO

DECORGRAIN

unsalted butter 82% fat

egg yolk

caster sugar

honey

salt

raisins diced candied orange

diced candied citron

PREPARATION

4500g The next morning, the dough shall be slightly curved.

 $\,$ 600g $\,$ Add DOLCE FORNO and DECORGRAIN to the first dough and knead for 5-10 $\,$

2000g minutes.

2400-2500g When well-combined, add sugar, honey, salt and 1kg of egg yolk, then knead

800g for about 10 minutes.

200g Pour the remaining egg yolk gradually in more times (about $\frac{1}{2}$ kg each

time) and knead until well-structured and smooth.

Add softened butter gradually in more times (about ½ kg each time) and

keep on kneading until the dough is smooth.

1500g Make sure that the temperature of the dough is 26-28°C (if the temperature

500g is lower, we recommend to slightly heat raisins and candied fruit by baking them for 1-2 minutes).

At the end, gently combine candied fruit and raisins to the dough.

Let the dough rest in the proofer room at 30°C for about 50 minutes.

At the end of the resting time, divide the dough into portions of the required size and roll each portion up into into a ball shape.

Move onto boards or trays and leave to rest for another 15-20 minutes.

Roll them up tight again and transfer into the specific paper moulds.

Put in the proofer room at 28-30°C with relative humidity of about 70% for 5-6 hours, until the top of the dough nearly leans out of the edge of the mould. If the proofer room is devoid of humidifier, cover the dough with plastic

sheets.

Final composition

At the end of the rising, leave the panettoni exposed to the air for 10 minutes until a light film forms over the surface.

With a small, sharp knife, make two superficial cuts to create a cross, cut the dough under the 4 flaps while throwing and folding them back, then place a pat of butter and return the 4 flaps back to the original position.

Bake at 170-190°C, time depending on the weight (consider about 35-40 minutes for 500g panettoni and 50-55 minutes for 1000g ones), until the temperature of the center reaches 92-95°C.

As soon as they are removed from the oven, the panettoni should be placed onto the specific toothed racks and left to cool upside down for 8-10 hours at least before being wrapped in Moplefan bags.
