

PANETTONE - PLATINUM RECIPE (DOLCE FORNO MAESTRO-NATUR ACTIV)

Basic level

Large leavened products

FIRST DOUGH

INGREDIENTS

DOLCE FORNO MAESTRO
NATUR ACTIV

water
egg yolk
caster sugar
unsalted butter 82% fat

PREPARATION

6500g Knead DOLCE FORNO MAESTRO, NATUR ACTIV and all the dose of water 400g indicated in the recipe.

2600g When the dough begins to take shape pour the sugar and then the

1600g yolks gradually in more than once and keep on kneading until the dough is

500g well-combined and smooth.

2000a At the end, add softened butter in 3-4 times.

Make sure that the temperature of the dough is 26-28°C.

Let rise for 12-14 hours at 22-24°C with the 70-80% of relative humidity. If the proofer room is devoid of humidifier, cover the dough with a plastic cloth. The dough shall quadruple its initial volume.

ADVICE:

- We suggest to cut out a 250g piece of dough and to put it into a 1L jug to check the pace of the leavening and verify the quadruplication of the volume.
- We suggest to begin to knead at second speed and then, when at $\frac{3}{4}$ of the kneading time, change to first speed and bring the kneading to end.
- If the temperature of the first dough is above 28°C , it will be necessary to decrease the leavening time.
- If you are using a planetary mixer with a "dough hook" attachment or a spiral mixer you will have to reduce the amount of water specified in the first

SECOND DOUGH

INGREDIENTS

salt

raisins

DOLCE FORNO MAESTRO

water egg yolk caster sugar unsalted butter 82% fat honev candied orange paste vanilla beans

diced candied orange

PREPARATION

3500g The next morning, the dough shall be slightly curved.

900g Add DOLCE FORNO MAESTRO and water to the first dough and knead for 5-

1250g 10 minutes.

When well-combined, add sugar, salt and one part of egg yolk. Then add the 700a

remaining egg yolk in two times. 2000q

Meantime, prepare a mixture of softened butter, honey, vanilla and orange 550a

paste. Once the mixture is ready, add it to the dough in 4 times. 550g

Be sure that the temperature of the dough is 26-28°C, if the temperature is 10g

lower we suggest you to warm up the candied fruit and raisins just for 1-2

110g minutes in the oven.

3000g Add gently the candied fruit and raisins.

2750g Let the dough rest in the proofer room at 28-30°C for about 75-90 minutes. Divide the dough into portions of the required size and roll each portion up into into a ball shape.

Move onto boards or trays and leave to rest at 28-30°C for another 20 minutes.

Roll them up tight again and transfer into the specific paper moulds. Put in the proofer room at 28-30°C with relative humidity of about 60-70% for 4-5 hours, until the top of the dough nearly leans out of the edge of the mould (1 cm below). If the proofer room is devoid of humidifier, cover the dough with plastic sheets.

Final composition

At the end of the rising, leave the panettoni exposed to the air for 20-25 minutes until a light film forms over the surface.

With a small, sharp knife, make two superficial cuts to create a cross, cut the dough under the 4 flaps while throwing and folding them back, then place a pat of butter and return the 4 flaps back to the original position.

Bake at 165-185°C, time depending on the weight (consider about 35-40 minutes for 500g panettoni and 50-55 minutes for 1000g ones), until the temperature of the center reaches 92-95°C.

As soon as they are removed from the oven, the panettoni should be placed onto the specific toothed racks and left to cool upside down for 8-10 hours at least before being wrapped in Moplefan bags.
