Pour the remaining egg yolk gradually in more times (about 1/2 kg each time).

Add softened butter gradually in more times (about 1/2 kg each time), until the dough is smooth.

Then, carefully combine raisins and candied fruit to the dough.

Make sure that the temperature of the dough is 26-28°C.

Let the dough rest in the proofer room at 28-30°C for about 60 minutes.

Divide the dough into portions of the required size, roll each portion up into into a ball shape, move onto boards or trays and leave to rest for another 15 minutes.

Roll them up again and transfer into the specific paper moulds. Put in the proofer room at 28-30°C with relative humidity of about 70% for 5-6 hours, until the top of the dough is only 1cm far from the edge of the mould.

Leave the 'panettoni' exposed to the air for 10 minutes until a light film forms over the surface. With a small, sharp knife, make two superficial cuts to create a cross, cut the dough under the 4 flaps while throwing and folding them back, then place a pat of butter and return the 4 flaps back to the original position.

#### **FINAL COMPOSITION**

Bake at 170-180°C, time depending on the weight.

As soon as they are removed from the oven, the panettoni should be placed onto the specific toothed racks and left to cool upside down for 10 hours at least before being wrapped in Moplefan bags.
